2

Power Connection

Connect the power cable to the power port on the back of the product. When the device plays a voice prompt, it indicates that the camera is powered on.

Quick Configuration

STEP 1 Download APP

Scan the QR code on the right or search for "Noorio Plus" in major app markets, download and install.

STEP 2 Register and Login

Register for an account in the app, and log in. If you have already registered, please log in directly.

STEP 3 Add Device

Open the app, tap the "Add Device" button, and follow the on-screen instructions or refer to the "Add Device" flow to add the device.

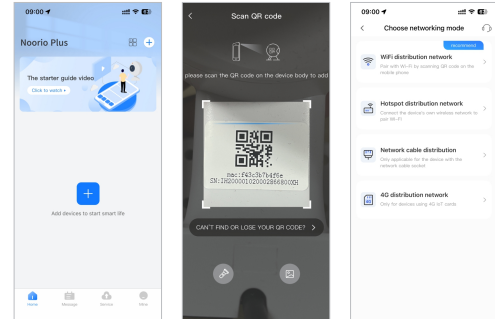

3

Wi-Fi Distribution Network step 1 (Wi-Fi Version Only)

• Power on the camera, you will hear a voice prompt or see the indicator light flashing.

• Enter the homepage of the app, click "+", and select "Add Device". Scan the QR code on the device and then select "Wi-Fi Distribution Network".

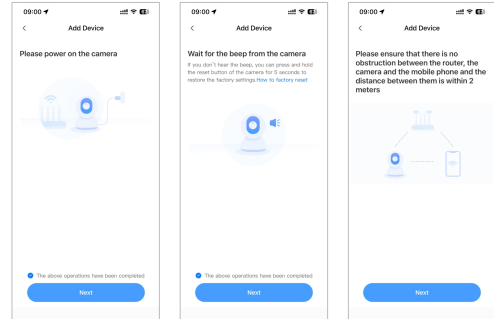

4

Wi-Fi Distribution Network step 2 (Wi-Fi Version Only)

• On the "Please power on the camera" interface, check "The above operations have been completed", and click "Next". On the "Wait for the beep from the camera" interface, check "The above operations have been completed", and click "Next".

• Make sure there are no obstructions among the router, the camera, and the mobile phone, and that the distance among them is within 2 meters. Then click "Next".

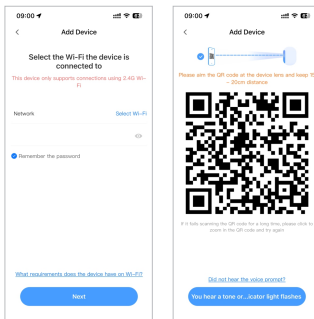

5

Wi-Fi Distribution Network step 3 (Wi-Fi Version Only)

• After selecting the Wi-Fi and entering the Wi-Fi password, click "Next".

• Hold the mobile phone screen directly in front of the camera lens, keeping a distance of 15-20 cm between them. Try to keep the mobile phone steady during the process. Once you hear the voice prompt or see the indicator light change, click on "You hear a tone or indicator light flashes" and wait for the addition to be completed.

6

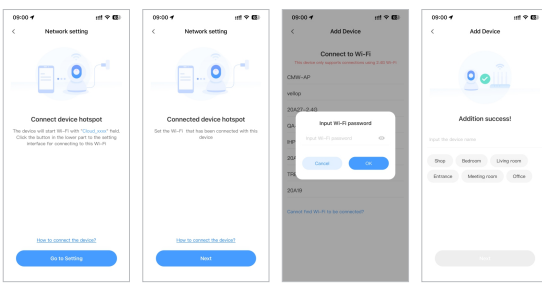

封面

Hotspot Distribution Network (Wi-Fi Version Only)

• Power on the camera, you will hear a voice prompt or see the indicator light flashing.

• Enter the homepage of the app, click "+", and select "Add Device". Scan the QR code on the device and then select "Hotspot Distribution Network". Follow the wizard to find the Wi-Fi network with the prefix "Cloud\_xxxx". Once the device is connected to the hotspot, click "Next".

• Select the Wi-Fi network to be paired, enter the password, and click "OK". Wait for the app to display "Addition Success" to complete device pairing.

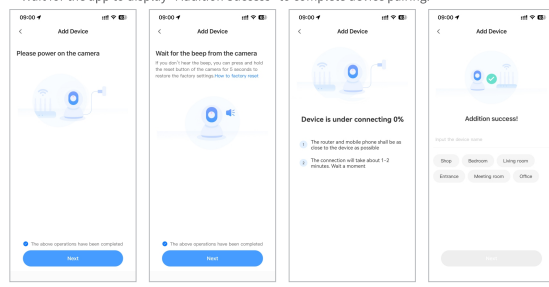

7

Network Cable Distribution

• Connect the network cable to the device's network port. Connect the other end of the network cable to the router. Power on the camera, you will hear a voice prompt or see the indicator light flashing.

• Enter the homepage of the app, click "+", and select "Add Device". Scan the QR code on the device and then select "Network Cable Distribution". On the "Please power on the camera" interface, check "The above operations have been completed", and click "Next". On the "Wait for the beep from the camera" interface, check "The above operations have been completed", and click "Next".

• Wait for the app to display "Addition Success" to complete device pairing.

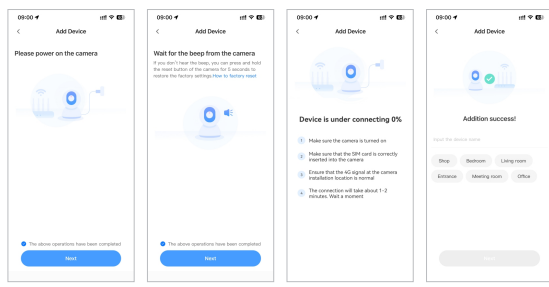

8

4G Distribution Network (4G Version Only)

• Power on the camera, you will hear a voice prompt or see the indicator light flashing. Wait for about 1 to 2 minutes until the device announces "4G network connection successful".

• Enter the homepage of the app, click "+", and select "Add Device". Scan the QR code on the device. On the "Please power on the camera" interface, check "The above operations have been completed", and click "Next". On the "Wait for the beep from the camera" interface, check "The above operations have been completed", and click "Next".

• Wait for the app to display "Addition Success" to complete device pairing.

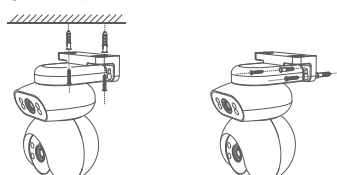

9

Installation Instructions

• The installation surface must be able to support three times the weight of the camera.

• The product supports both ceiling and wall mounting methods. The installation steps are as follows: drill holes in the wall, insert the wall plugs, and then install the screws to secure the camera (wall plugs are not required for wooden walls).

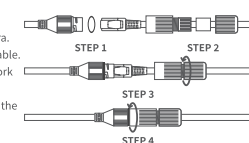

Install the Weatherproof Kit

Step1: Insert the gasket into the ethernet port of the camera.

Step2: Thread the weatherproof kit through the network cable.

Step3: Tighten the weatherproof kit and connect the network cable to the ethernet port.

Step4: Tighten the weatherproof kit at the ethernet port of the camera

FAQ

Q: How to store video?

A: Cameras support two storage methods: local storage and cloud storage (requires a subscription).  
Local Storage: Store the video recorded by the camera on a Micro SD card.  
Cloud Storage: The video recorded by the camera is stored in the cloud. Depending on the video storage duration, three types of recent 3 days, 7 days, and 30 days can be stored cyclically, and online viewing and downloading of historical videos are supported.

Q: Why can't the camera connect to the Wi-Fi network?

A: Currently, the camera supports 2.4G Wi-Fi with 802.11 b/g/n protocol, but does not support 5G Wi-Fi. Please make sure that the Wi-Fi signal of the wireless router connected to the camera is within the coverage.

Q: The camera is abnormally offline, how to check it?

A: • Check whether the power supply and network are normal;  
• Re-plug the power supply to restart the device;  
• Reconfigure the camera.
