Quick Configuration

STEP 1 Download APP
Scan the QR code below or search for "Noorio Plus" in major app markets, download and install.

STEP 2 Register and log In
Register for an account in the app, and log in. If you have already registered, please log in directly.

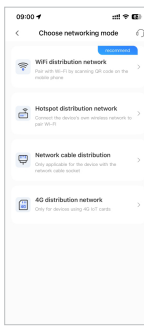

STEP 3 Add Device
Open the app, tap the "Add Device" button, and follow the on-screen instructions or refer to the "Add Device" flow to add the device.

*Due to APP upgrades and updates, the actual operation may be slightly different from the above description, please follow the instructions in the APP to operate.

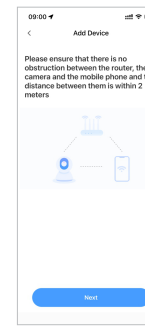

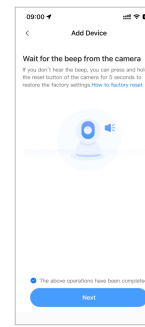

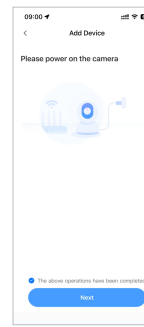

Wi-Fi Distribution Network Step 1

- Power up the camera, you will hear a voice prompt or see the indicator light flashing.
- Enter the homepage of the app, click "+", and select "Add Device". Scan the QR code on the device and then select "Wi-Fi Distribution Network".

Wi-Fi Distribution Network Step 2

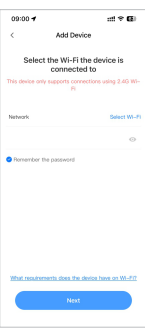

- On the "Please power on the camera" interface, check "The above operations have been completed", and click "Next". On the "Wait for the beep from the camera" interface, check "The above operations have been completed", and click "Next".
- Make sure there are no obstructions between the router, the camera, and the mobile phone, and that the distance between them is within 2 meters. Then click "Next".

封面

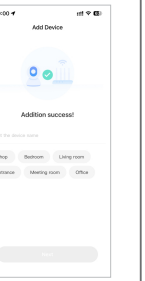

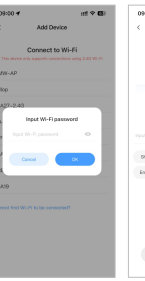

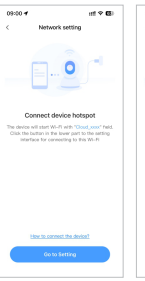

Wi-Fi Distribution Network Step 3

- After selecting the Wi-Fi and entering the Wi-Fi password, click "Next".
- Hold the mobile phone screen directly in front of the camera lens, keeping a distance of 15-20 cm between them. Try not to let the mobile phone shake during the process.After hearing the device prompt tone or the indicator light change, click "You hear a tone or indicator light flashes", and wait for the addition to succeed.

Hotspot Distribution Network

- Power up the camera, you will hear a voice prompt or see the indicator light flashing.
- Enter the homepage of the app, click "+", and select "Add Device". Scan the QR code on the device and then select "Hotspot Distribution Network".Follow the wizard to find the Wi-Fi network with the prefix "Cloud_xxxx". Once the device is connected to the hotspot, click "Next".
- Select the Wi-Fi network to be paired, enter the password, and click "OK". Wait for the app to display "Addition Success" to complete device pairing.

Home Security Cloud Storage Introduction

1.What is cloud storage?
Home security cloud storage stores videos recorded by security equipment in the cloud, which can be viewed online at any time through the app.

2.What are the advantages of home security cloud storage?
This service provides more timely storage with instant upload, anti-theft, and anti-damage features. The content is more secure with bank-level encryption and dedicated mobile data centers. It offers more attentive protection with 24-hour recording and storage, providing a complete record of events and not missing any highlights.

3.How to Subscribe home security cloud storage service?
Depending on your purchase channel, you can subscribe to home security cloud storage services via the app.

Installation Instructions (For Indoor Use Only)

- Cement wall: Use the wall mounting bracket to drill holes in the wall, insert the wall plugs, and then insert the screws to secure the wall mounting bracket.
- Wooden wall: Align the hole in the wall mounting bracket, and then insert the screws directly to secure it.
- Align the camera base with the wall mounting bracket buckle, and rotate to secure the camera.

FAQ

Q: How to store video?
A: Cameras support two storage methods: local storage and cloud storage (requires a subscription).
Local Storage: Store the video recorded by the camera on a Micro SD card.
Cloud Storage: The video recorded by the camera is stored in the cloud. Depending on the video storage duration, three types of recent 3 days, 7 days, and 30 days can be stored cyclically, and online viewing and downloading of historical videos are supported.

Q: Why can't the camera connect to the Wi-Fi network?
A: Currently, the camera supports 2.4G Wi-Fi with 802.11 b/g/n protocol, but does not support 5GWi-Fi. Please make sure that the Wi-Fi signal of the wireless router connected to the camera is within the coverage.

Q: The camera is abnormally offline, how to check it?
A: - Check whether the power supply and network are normal;
- Re-plug the power supply to restart the device;
- Reconfigure the camera.

List of Restricted Substances or Elements Identification

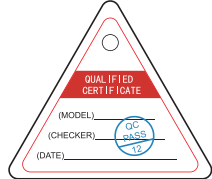

Part Name	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent Chromium (CrVI)	Polybrominated Biphenyls (PBBs)	Polybrominated Diphenyl Ethers (PBDEs)
Sheet Metal Parts	X	O	O	O	O	O
Plastic Parts	O	O	O	O	O	O
Circuit Board	X	O	O	O	O	O
Lens	O	O	O	O	O	O
Power Supply	X	O	O	O	O	O
Appendix	X	O	O	O	O	O

Illustrate:
1. O indicates that the content of restricted substances in all homogeneous materials of this part is below the limit requirement stipulated in the SJ/T 11363-2006 standard;
2. X indicates that the content of the restricted substance in at least one homogeneous material of the part exceeds the limit requirement stipulated in the SJ/T 11363-2006 standard.
